SUBJECT INDEX

Advanced Very High Resolution Radiometer (AVHRR) 358
Africa coast (NW) *see* Atlantic Ocean (East)
Aghulas Current
  baroclinicity 12, 13
  bottom effects 15, 16
  eddies 13–15
  flow pattern 11, 12
  velocity 12
Algae
  in particle flux 82–5
  as radiation absorber 267–8, 273–6
Angola Dome 26, 28
Antarctic Circumpolar Current (ACC) 11
  volume transport 51–6
  zonation 42–51
Antarctic Convergence 43, 48
Antarctic Front 45
Antarctic Polar Front 43
Antarctic Zone (AZ) 42, 44
Assimilation scheme 180–5
Atlantic Ocean (East) 309
  seasonality studies 319–20
    density 330–4, 345–7, 349
    salinity 320, 326–9, 340–3, 348
    temperature 320, 322–5, 335–9, 349
  surface circulation
    large scale 310–12, 351
    small scale 315–16
  undercurrents 316
  upwelling studies 308
    chlorophyll concentrations 380–3, 398–400
    methods
      AVHRR 358–9
      CZCS 359
    temperature patterns
      autumn 375–7, 389
      spring 361, 368–8, 385, 388
      summer 370–4, 388–9
      winter 360–1, 365–7, 378–9
    wind effects 359–60
      autumn 393–5
      spring 386
      summer 387, 390–2
      winter 362–4, 396–7
  water masses 317
  winds 312–13
Atlantic Ocean (South)
  bathymetry 4
  circulation
    Aghulas Current 11–16
    Antarctic Circumpolar Current 42–56
    Benguela Current 16–18
    Brazil Current 32–8, 50
    Equatorial currents 18–32
    South Atlantic Current 39–42
  climatic setting 2
  geostrophic currents 3
  heat gain 6, 10
  heat transport 59–61
  sea level pressure 5
  surface temperature 11
  wind direction 6, 7
  wind stress 6, 8, 9
Australasian Subantarctic Front 45

Basset history terms 255
Bellingshausen Sea 46
Benguela Current 16–18
Biomass and production 298–9
Brazil Current 19, 32–8, 50
Brazil Current Front (BCF) 35
British Columbia tsunami study
  modelling
    data set collection 123–6
    deep ocean equations
      development 126–40
      numerical scheme 142–8
    inlet equations
      development 141–2
      numerical scheme 151–2
    shelf equations
      development 141–2
      numerical scheme 148–51, 168–77
    summary 164–6
    testing
      preliminary 152–7
      tidal calibration 157–9
      verification 160–4
  propagation 121–3
  sources 118–21
  tide gauge data 130

Canada, Pacific Coast *see* British Columbia
Canary Current 310, 312, 316
Cape Basin 17, 18
Carbon fixation 284–9
Chemoreception and turbulence 255–6
Chlorophyll and carbon fixation 284–9, 295–7
Chlorophyll concentrations 380–3, 398–400
Cloud and photosynthesis 299–300
Coastal Zone Color Scanner (CZCS) 359
Continental Water Boundary (CWB) 42, 44, 46
Continental Zone (CZ) 42, 44
Cooperative Investigation of the Northern Part of the Eastern Central Atlantic (CINECA) 317, 358
Copepod feeding strategy
  application of fluid mechanics 258–9
    flow regimes 248–52

forces 244–8
motility effects 252–3
turbulence effects 253–8

Density variations, East Atlantic Ocean 330–4, 345–7, 349
Diatoms in particle flux 85
Drake Passage 46, 52–3

El Niño 231
El Niño/Southern Oscillation (ENSO) 29–32
Encounter rates 256
Equatorial Undercurrent (EUC) 21

Falkland Current 11, 47
Fecal pellets in particle flux 91–5, 102–4
First GARP Global Experiment (EGGE) 18
Fluid mechanics
applied to planktonic prey 258–9
flow regimes 248–52
forces 244–8
motility effects 252–3
turbulence effects 253–8
Foraminifera in particle flux 86–90
Français Océan Climat Atlantique Equatorial (FOCAL) 18

Gabon–Congo Undercurrent 26
General Circulation Model 310
Global Atlantic Tropical Experiment (GATE) 18
Global Atmospheric Research Program (GARP) 18
Guinea Current 310
Guinea Dome 26, 28

Harmattan winds 360

International Southern Ocean Studies (ISOS) 42
Intertropical Convergence Zone (ITCZ) 29

Kalman filtering 181–2
Kelvin waves 206, 207, 212, 213, 227

Light utilization index 265

Malvinas Current (Falkland Current) 11, 47
Mathematical modelling *see* Modelling
Mechanoreception and turbulence 255–6
Meinardus Line 43
Michaelis–Menten–Monod type formulation 277
Modelling
applications *see* Variational analysis
photosynthesis
global equations 279
parameters 280–1
processes
available radiation 269–71
downwelling irradiance 271–3
quantum yields 276–8
results
biomass factors 298–9
carbon fixation 284–9
chlorophyll maximum layer 295–7
cloud effects 299–300
incubation factors 301–2
pheopigment effects 297–8
primary production 290–4
sensitivity 281–4
tsunamis
data set collection 123–6
deep ocean equations
development 126–40
numerical scheme 142–8
inlet equations
development 141–2
numerical scheme 151–2
shelf equations
development 141–2
numerical scheme 148–51, 168–77
summary 164–6
testing
preliminary 152–7
tidal calibrations 157–9
verification 160–4

Natal pulse 11
Net carbon fixation 284–9
North Brazil Current (NBC) 19
North Brazilian Coastal Current 19
North Equatorial Countercurrent (NECC) 19, 310, 312
North Equatorial Current 310, 312
North Equatorial Undercurrent (NEUC) 25

Oceanic Polar Front 43
Optimal interpolation 181–2

Pacific Coast *see* British Columbia
Pacific Ocean
modelling *see under* variational analysis
see also Particle flux study
Particle flux
analytical techniques
carbon conversions 81–2
microscopy 78–81
composition 76–7
depth effects 104–6
methods of sampling 77–8
results
algae (general) 82–5
amorphous matter 95
diatoms 85
fecal pellets 91–5
foraminifera 86–90
protozoa (general) 85
radiolaria 86–90

total biomass 91
sources of flux
community productivity 95–7
fecal contributions 102–4
living contributors 97–102
particle aggregates 104
Pheopigment and production 297–8
Photosynthetic energy storage 264–5
modelling
global equations 279
parameters 280–1
processes
available radiation 269–71
downwelling irradiance 271–3
quantum yields 276–8
results
biomass factors 298–9
carbon fixation 284–9
chlorophyll maximum layer 295–7
cloud effects 299–300
incubation factors 301–2
pheopigment effects 297–8
primary production 290–4
sensitivity 281–4
net growth rate equation 265–6
factors affecting
absorption section 267–8
depth 267
time 267
wavelength 267
simplification 268–9
Plankton
interactions with fluid medium 244–8
effects of flow regime 248–52
motility effects 252–3
turbulence effects 253–8
Platt type formulation 278
Polar Front (PF) 42–6, 48, 50
Polar Front Zone (PFZ) 42, 44, 45
Polynomial interpolation 180–1
Predator–prey relations
application of fluid mechanics 258–9
flow regimes 248–52
forces 244–8
motility effects 252–3
turbulence effects 253–8
Protozoa in particle flux 85

Radiolaria in particle flux 86–90
Reynolds number 245–6, 257
Rossby waves 206, 207, 212, 213, 227

Salinity variations, East Atlantic Ocean 320, 326–9, 340–3, 348
Scotia Front 46
Seasonal Equatorial Atlantic (SEQUAL) program 18
Seismic sea waves *see* Tsunamis
Shumagin Gap 121, 164, 165
South Atlantic Current
circulation 39
geostrophic flow 41–2
Subtropical Front 40–1
South Equatorial Countercurrent (SECC) 25
South Equatorial Current (SEC) 19
South Equatorial Undercurrent (SEUC) 25
Southern Oscillation 29–31, 32
Spectral distributions 271
Statistical interpolation 181–2
Steele type formulation 277
Subantarctic Front (SAF) 35, 42, 44, 45, 47, 50
Subantarctic Mode Water (SAMW) 51
Subantarctic Zone (SAZ) 42, 44, 47
Subtropical Front (STF) 35, 40–2

Temperature variations
East Atlantic Ocean 314, 320, 322–5, 335–9, 349
autumn 375–7, 389
spring 361, 368–9, 385, 388
summer 370–4, 388–9
winter 360–1, 365–7, 378–9
Tsunamis (British Columbia coast study)
modelling
data set collection 123–6
deep ocean equations
development 126–40
numerical scheme 142–8
inlet equations
development 141–2
numerical scheme 151–2
shelf equations
development 141–2
numerical scheme 148–51, 168–77
summary 164–6
testing
preliminary 152–7
tidal calibration 157–9
verification 160–4
propagation 121–3
sources 118–21
tide gauge data 130

Upwelling, Atlantic Ocean (East) 308, 312–13, 350
methods of study 358–9
wind effects 359–60

Valdivia Bank 17, 18
Variational analysis 182
application to Pacific Ocean modelling 234–7
adjoint equations 205–7
data assimilation 210–12
constant phase speed 212–20
real sea level data 228–34
variable phase speed 221–7
numerical model 202–4
sea surface elevation 207–10
wind forcing 207
descent methods 191–2
conjugate gradient 192–5
Newton's methods 195–7
step length computation 197–9

formalism
computation 190–1
cost function 188–9
method 185–8
solution procedure 189–90
parameter estimation 199–202

Webb type formulation 278

Weddell Front 46
Weddell Sea 46
Weddell-Scotia Confluence 46
Wind patterns
East Atlantic Ocean 359–60
autumn 393–5
spring 386
summer 387, 390–2
winter 362–4
